

Bhoj Bahadur Karki

Software Developer

Kathmandu | 9849818778 | bbk2049@gmail.com

Web: www.bhojkarki.com.np

Summary

A young and enthusiastic software developer with four plus years experience in web, desktop and mobile development and two and a half years of experience in embedded system software development. An accomplished and driven professional with an entrepreneurial spirit. Possessing a proven ability to contribute to a company at both strategic and operational level. Passionate about bringing positive change in the corporation with the help of technology.

Experience

2018/sept-2019/jan	<p>Software engineer Angelswing, South Korea</p> <p>During this time period I was assigned various task related python and ruby on rails. I build api based on AWS, python and rails. Processed large set of drone data(4-5 GB normally) and analyzed various parameters to generate chlorophyll calculator, nvdi calculator, etc. I was assigned to build various api for GIS related application.</p> <p>Tools used during this time period: python, ruby on rails, bash, AWAS, QGIS, slack</p>
2017-2018/sep	<p>Django/Python developer OLE-Nepal , Nepal</p> <p>Was responsible for building pustakalaya.org which has more than 7,000 content including documents,audio and video from design to finished product with other developers. I mainly focused on backend part but also did frontend in this project. My main responsibilities were:</p> <ul style="list-style-type: none">• Responsible for designing core part of database schema along with other developer• Responsible for creating search filter using vue.js• Refactored and reviewed other members code.• Responsible for search suggestion, social login system, feedback system, add to favorites, review system , etc• I also collaborated with other developers in building other feature in this application from start to finish.• Helped building API of the platform for further mobile application development for other developers• Implemented docker for production and solved issues related to production.• Technology used in this application : django, python , vue.js, Elasticsearch, Redis, postgres(production), sqlite(development) , celery, javascript, jquery,sass, gulp. <p>Link : pustakalaya.org GitHub link: https://github.com/bhoj001/pustakalaya_lib (recently we have moved to gitlab on our own server)</p>
2015- 2017	<p>Embedded system software developer Temcocontrols pt. Ltd. , Canada</p> <p>Performed software design and development based on the TemcoControls hardware by collaboration with hardware engineers.</p> <ul style="list-style-type: none">• Performed data manipulation form T3000 hardware (Temco device) based on Bacnet and Modbus protocol.

	<ul style="list-style-type: none"> Performed IOT works by taking data from hardware and the internet and comparing both of them. Based on the analysis different analytical diagrams were created. Data were pulled from sensor to T3000 controller and to our software through Bacnet protocol. Developed different types of mapping function on the data and presented in the software. Presented a simulation of different devices running under T3000 in visual ways. Studied and presented data on different charts such as PH Chart and Psychrometric chart. Collaborated with team members for debugging and testing. Traced bugs and improved features regularly. Developed system mostly on .net framework and windows operating system. <p>Project link:</p> <p>1. https://github.com/temcocontrols/T3000_Building_Automation_System</p> <p>2. Major work:</p> <p>(a) https://github.com/temcocontrols/T3000_Building_Automation_System/tree/master/Psychrometric%20Tool/PH_Application</p> <p>(b) https://github.com/temcocontrols/T3000_Building_Automation_System/tree/master/Psychrometric%20Tool/Psychro%20Tool</p>
2014- 2015	<p>Freelance web developer</p> <p>During this period I was responsible for development of the websites and their content. I had to work on for 3 months building this site.</p> <ul style="list-style-type: none"> Responsible for design, development, and deployment of website Responsible for Search Engine Optimization (SEO), and google analytics works. Responsible for teaching and handling the content of the site. Giving constant feedback and support for client. <p>Project and their Link:</p> <p>1. http://www.hitechintl.edu.np/</p>
2015-2016	<p>Startup KtmKart.com</p> <ul style="list-style-type: none"> Developed ecommerce platform using Magento platform This platform helps to sell different products from vendors to consumers through digital platform <p>link: https://www.facebook.com/ktmkart/</p>
2014-2015	<p>Optical Mark Recognition software</p> <p>This is my major project during my college years. In this software I have applied series of image processing algorithms for recognition and detection of marks as well as filtering students results based on the recognized mark sheet. Bubbled filled sheet will be provided to students where they will fill the form with correct answers then those sheets will be scanned with a scanner and feed into our system for further processing. Our system will take the image and process it and compares it with the correct answer template and prints all the students results into one sheet for teacher.</p> <p>Processes involved in the software:</p> <ul style="list-style-type: none"> Designing sheet Grey Conversion Histogram processing and threshold calibration

	<ul style="list-style-type: none"> ● Binary conversion ● Corner detection ● Rotation ● Mark detection ● Cluster filtering ● Evaluation of roll number
	<p>Other Project: During college times and my career I have developed other projects besides my work:</p> <ul style="list-style-type: none"> ● Image editor ● Web scraper ● Git tool for automatic push and commit at certain day in week ● Online movie site booking system, ● Attendance system (java, android). ● Scientific calculator(in C# and in MFC C++) ● Ecommerce site in Magento for KtmKart ● Space Shooter, bubble jump, target shooter Games in C# using unity

Education

2011- 2015	<p>B.E Computer Nepal Engineering College, Bhaktapur (Pokhara University) Grade :First Division</p>
------------	--

Skills and Abilities

I have the following technical skills :

- Fluent in programming languages: Python, JavaScript, JQuery, AJAX,
- Familiar with: C# (.NET), JAVA, C/C++, PHP, Matlab, Postgres, MSSQL, MySQL, Access Database, SQLite, node.js, MongoDB.
- Good concepts of OOPs, MVC, Design patterns, Restful api, Network programming, data extraction and data visualization
- Framework:
 - Front end : Vue.js, React
 - Backend : Django(web)
 - familiar with: .net , wordpress, android studio
- Familiar with Linux and windows .
- DevOps tools: bash script, docker, aws, heroku, linux, nginx, redis, celery, elasticsearch
- CI/CD: jenkins, gitlab
- Version control: GitHub, Gitlab
- Project management tools : Asana, Trello
- Design tools: Adobe XD, gimp, photoshop
- communication: slack, hexchat, skype
- CMS: Wordpress, django CMS
- Other tools: html5 , css3, sass, gulp, bootstrap
- Fluent in different languages such as English, Nepali and Hindi.

Personality Trails

- Keen of bringing positive change in society by means of technology.
- Proactive, confident and with a positive "can-do" attitude.
- Ability to work under pressure, punctual, dedication towards work.
- Collaborative and able to work in teams or groups

Awards

- Received full scholarship for bachelor's program from Pokhara University.

Trainings

- Game development program in C# organized by Microsoft Innovation Centre, Nepal
- Android app development training organized by Nepal Engineering College(NEC)
- Web development using PHP and JavaScript organized by NEC
